

Date: 22nd November 2019

**ELECTRICITY GENERATING AUTHORITY OF THAILAND CO-HOSTS
FUTURE ENERGY ASIA EXHIBITION AND CONFERENCE 2020**

Dear Industry Colleagues,

The Electricity General Authority of Thailand has the honour to co-host the Future Energy Asia Exhibition and conference 2020 (Future Energy Asia 2020), held on 12 - 14 February 2020 at Bangkok International and Trade and Exhibition Center (BITEC), Bangkok, Thailand under the theme **“Building the Bridge to Clean Energy.”** In this event, there will be three major conferences and expositions which are (i) Oil and Gas, (ii) Transmission and Distribution, and (iii) Renewable Energy.

The Future Energy Asia 2020 is a unique event that brings together Asia’s leaders and professionals from government agencies, power utilities, new energy suppliers, private sectors, and companies throughout the energy transition supply chain, to discuss, debate and showcase innovative products, services and solutions. It is expected that the collaboration via scene-setting plenary dialogues among those will drive forward our energy industry in Asia into a lower carbon society and sustainable energy future.

Thus, as a co-host of the event, I encourage you to join forces with us in making this Future Energy Asia 2020 a great success by becoming meaningful participants to the event. With active engagement and supports, I believe that your company and organization will have the opportunities to explore how you can **participate and together innovate the NewGen Integration of Gas, Power and Renewables for the Future Energy of Asia!**

Yours Sincerely

(Mr. Prasertsak Chergchawano)
Assistant Governor – Corporate Strategy
